### PROJECTS

**Online Education Platform Development** Write here Developed a comprehensive web application using HTML, Bootstrap, JavaScript, and CSS, with Django as the backend and SQL for database management. The platform enables administrators to manage tutor requests, content, and reports. Tutors can upload materials, interact with parents, and manage online tests, while parents can book tutors, make payments, and track their child's progress. Ensured seamless functionality, data integrity, and user-friendly interfaces by adhering to best coding practices. the description...
